

TiXmlHandle::Child

```
graph LR; A[TiXmlHandle::Child] --> B[TiXmlNode::NextSibling]; A --> C[TiXmlHandle::TiXmlHandle];
```

The diagram illustrates a pointer relationship from the `TiXmlHandle::Child` method to two other components. The `TiXmlHandle::Child` box is shaded gray, while the other two are white. Two blue arrows originate from the right side of the `TiXmlHandle::Child` box, pointing to the `TiXmlNode::NextSibling` box (top) and the `TiXmlHandle::TiXmlHandle` box (bottom).

TiXmlNode::NextSibling
